Code	Activity	Internship Period (Weeks)							
		1st Month				2nd Month			
		1	2	3	4	5	6	7	8
A100	**Analysis of REST API functional attributes**								
A101	Defining a mechanism for capturing the functional semantics of REST APIs	■	■						
A102	Integrate the mechanism defined in activity A101 to the architecture depicted in [1]		■	■					
A103	Implementation of a prototype for processing REST APIs			■					
A200	**Refinement of the Reference Architecture [1]**								
A201	Study of the Online LDA (Latent Dirichlet Allocation) probabilistic model			■	■				
A202	Study of the Formal Concept Analysis (FCA).				■	■			
A203	Defining a mechanism for RDF-described taxonomy generation.					■			
A204	Adaptation of the Reference Architecture.						■		
A300	**Implementation of a funtional prototype**								
A301	Identifing tools for supporting the implementation of Online LDA and FCA.						■		
A302	Implementing the mechanism for service annotation defined in the updated architecture.						■	■	
A400	**Approach to experimental testing of the proposal.**								
A401	Defining metrics and indicators.							■	■
A402	Experiment Desing.								■
A500	**Synthesis of the research - Final report**								
A501	Preparation of a paper regarding the main findings of the work.				■	■	■	■	■
